

A black and white photograph of a cave interior. The ceiling is covered in numerous stalactites of varying lengths and thicknesses, hanging down towards the ground. The lighting is dramatic, highlighting the textures of the rock formations. The word "PERFORM" is centered in the middle of the image in a white, sans-serif font.

# WOOD GRAINS

No surprise that natural light wood tones is back in style in a big way. Following the Scandinavian-inspired trend of simple, versatile design, lighter wood surfaces easily find a space in pretty much any aesthetic.

The effect of grain with a shade of knots can offer casual, bright or cheerful depending on how the wood is used.

STONES

NEW ITEM

## STONES

As consumers reconnect with the past and spiritual, stores via facade should provide powerful, sensorial experiences.

Imperfection is embraced through aged surfaces, handcraft and well-worn settings, as an art decoration.
